Dear Sir:

Herewith is Form PTO-1449 together with one copy of each document listed thereon. German language document EP0597349 appears to relate to byte-wise alignment of plesiochronous signals. The signals appear to be stored in separate regions of a memory, and then output therefrom in time-division multiplex fashion. The signals output from the memory are converted into serial data signals by parallel-to-serial converters.

Respectfully submitted,

Scott B. Stahl  
Reg. No. 33,795
